SPECTROCHIMICA ACTA
PART B: ATOMIC SPECTROSCOPY

CONTENTS OF VOLUME 46B 1991

No. 1

In this issue:

M. Czajkowski, R. Bobkowski and L. Krause	1	***Topics in Laser Spectroscopy:*** Depopulation of the 5^3P_1 state of cadmium by collisions with ground-state Cd and noble-gas atoms
D. J. Butcher, R. L. Irwin, S. Sjöström, A. P. Walton and R. G. Michel	9	***Topics in Laser Spectroscopy:*** Probe atomization for laser enhanced ionization in a graphite tube furnace
S. J. Cathum, C. L. Chakrabarti and J. C. Hutton	35	Investigation of the order of copper atomization at the absorbance maximum in graphite furnace atomic absorption spectrometry
L. J. Prell and D. L. Styris	45	Mechanism of electrothermal atomization for yttrium by mass spectrometry
M. Ochsenkühn-Petropoulou, K. Ochsenkühn and J. Luck	51	Comparison of inductively coupled plasma mass spectrometry with inductively coupled plasma atomic emission spectrometry and instrumental neutron activation analysis for the determination of rare earth elements in Greek bauxites
R. Guevremont and K. Nimalasiri De Silva	67	Direct introduction of powder samples for inductively coupled plasma atomic emission spectrometry: effect of particle size on emission intensity
I. Roelandts	79	Inductively coupled plasma determination of nine rare-earth elements in the U.S. Geological Survey Kesterson Bottom Sediment, BSK-1
K. R. Brushwyler, N. Furuta and G. M. Hieftje	85	Characterization of a spectrally segmented photodiode-array spectrometer for inductively coupled plasma atomic emission spectrometry
		Technical Note
P. Verrept, C. Vandecasteele, G. Windels and R. Dams	99	Use of a refractor plate for automatic background correction in electrothermal vaporization inductively coupled plasma atomic emission spectrometry

Research Note

I. Atsuya, T. Itoh and T. Kurotaki 103 Inductively coupled plasma atomic emission spectrometry of powdered samples using the miniature cup technique

GDL ISSUE (PART I)

Analytical Atomic Spectrometry: Use and Exploration of Low Pressure Discharges

111 Preface

G. Ehrlich, U. Stahlberg, V. Hoffmann and H. Scholze 115 Glow discharge optical emission spectroscopy as applied to the analysis of powdered materials

H. Nickel, D. Guntur, M. Mazurkiewicz and A. Naoumidis 125 Contribution to the quantification of glow discharge emission depth profiles for oxide scales on Ni-base alloys

W. Vieth and J. C. Huneke 137 Relative sensitivity factors in glow discharge mass spectrometry

N. Jakubowski, D. Stuewer and G. Toelg 155 Microchemical determination of platinum and iridium by glow discharge mass spectrometry

Y. Shao and G. Horlick 165 Design and characterization of glow discharge devices as complementary sources for an "ICP" mass spectrometer

Y. Mei and W. W. Harrison 175 Getters as plasma reagents in glow discharge mass spectrometry

C. L. Chakrabarti, K. L. Headrick, J. C. Hutton, P. C. Bertels and M. H. Back 183 The performance of a new laboratory-constructed cathodic-sputtering atomizer in atomic absorption spectrometry

J. C. Hutton, C. L. Chakrabarti, P. C. Bertels and M. H. Back	193	Sputtering and transport processes in a new laboratory-constructed sputtering atomizer
P. G. Riby, J. M. Harnly, D. L. Styris and N. E. Ballou	203	Emission characteristics of chromium in hollow anode-furnace atomization non-thermal excitation spectrometry
S. Tanguay and R. Sacks	217	Heating characteristics and atomic emission waveforms for glow discharge ion bombardment furnaces
K. Trivedi, S. Brewer, L. McCaig, N. Sesi and R. Sacks	229	Physical properties of a planar magnetron glow discharge
F. Leis, J. A. C. Broekaert and E. B. M. Steers	243	OES-Measurements on aluminium, copper and lead samples with a microwave-boosted glow discharge lamp
M. K. Levy, D. Serxner, A. D. Angstadt, R. L. Smith and K. R. Hess	253	Optical investigations of excitation processes responsible for ionized sputtered species in a low pressure, low current, coaxial geometry glow discharge
K. Wagatsuma and K. Hirokawa	269	Spectrometric studies of excitation mechanisms on singly-ionized copper emission lines in Grimm-type glow discharge plasmas with helium mixture technique
M. van Straaten, A. Vertes and R. Gijbels	283	Sample erosion studies and modeling in a glow discharge ionization cell
P. L. Larkins	291	The effect of water vapour on atom production by glow-discharge sputtering
J. B. Womack, E. M. Gessler and J. D. Winefordner	301	Atomic fluorescence in a pulsed hollow cathode discharge with a copper vapor pumped dye laser
		Research Note
K. C. Ng, A. H. Ali and J. D. Winefordner	309	Atomic emission detection of non-metals in vapors injected into helium hollow cathode discharge
	I	*Software Survey Section*
	V	*Aims and Scope*

No. 3

In this issue:

P. W. J. M. Boumans	315	Obituary—Dr. F. J. M. J. Maessen 1931–1990
E. B. Saloman	319	***Topics in Laser Spectroscopy:*** A Resonance Ionization Spectroscopy/Resonance Ionization Mass Spectrometry data service. II—Data sheets for Al, Ca, Cs, Cr, Co, Cu, Kr, Mg, Hg and Ni
J. Dědina	379	Atomic absorption coefficient of the Se 196 nm line—theoretical calculation and experimental evaluation
J. M. Goldberg and K. P. Carney	393	Emission characteristics of imploding thin film plasma atom cells
Benli Huang, Jinfu Yang, Aili Pei, Xianjin Zeng and P. W. J. M. Boumans	407	Studies on inductively coupled plasma sample introduction—II. Use of ethanol–water solutions and desolvation
Qinhan Jin, Chu Zhu, M. W. Borer and G. M. Hieftje	417	A microwave plasma torch assembly for atomic emission spectrometry
P. W. J. M. Boumans	431	***Views and Criticisms:*** Measuring detection limits in inductively coupled plasma emission spectrometry using the "SBR–RSDB approach"—I. A tutorial discussion of the theory
		Research Note
T. J. Manning, B. A. Palmer, D. E. Hof and J. D. Winefordner	447	Supplemental data on line shifts and line profiles studies in an inductively coupled argon plasma

GDL ISSUE (PART II)

Analytical Atomic Spectrometry: Use and Exploration of Low Pressure Discharges

457 Preface

S. Grazhulene, V. Khvostikov and M. Sorokin 459 The possibilities of glow discharge cathode sputtering for laser atomic-fluorescence analysis of microelectronics materials

S. A. Dashin, Yu. A. Karpov, O. A. Kushlyansky, I. A. Mayorov and M. A. Bolshov 467 Laser excited atomic fluorescence analysis of pure materials with sample atomization by ion sputtering

M. R. Winchester, C. Lazik and R. K. Marcus 483 Characterization of a radio frequency glow discharge emission source

P. R. Banks and M. W. Blades 501 Power, flow rate, and pressure effects in a jet-assisted glow discharge source

C. M. Strange and R. K. Marcus 517 Aqueous sample introduction into a glow discharge device via a particle beam interface

E. B. M. Steers and F. Leis 527 Excitation of the spectra of neutral and singly ionized atoms in the Grimm-type discharge lamp, with and without supplementary microwave excitation

Research Note

Zs. Szilvássy-Vámos, A. Buzási-Győrfi and E. Házi 539 Study of material ablation in a water cooled hollow cathode using radioactive tracers

I *Software Survey Section*

V *Aims and Scope*

No. 5

In this issue:

I. I. Popescu, M. A. Brătescu and M. P. Dincă 547 ***Topics in Laser Spectroscopy***: A new plasma spectroscopic technique based on laser induced frequency shift of pseudosonic ion waves

N. V. Chekalin, A. G. Marunkov, V. I. Pavlutskaya and S. V. Bachin 551 Determination of traces of Cs, Li and Rb in rocks by laser enhanced ionization spectrometry without preconcentration

K. E. Anders Ohlsson and W. Frech 559 Quantitative *in situ* spectroscopic measurements and thermodynamic equilibria modelling of CN and C_2 in a graphite furnace

I. L. Shuttler, G. Schlemmer, G. R. Carnrick and W. Slavin	583	The stability of graphite furnace characteristic mass data
D. Beauchemin and J. M. Craig	603	Investigations on mixed-gas plasmas produced by adding nitrogen to the plasma gas in ICP–MS
M. R. Winchester, S. M. Hayes and R. K. Marcus	615	Determination of platinum and rhodium in γ-alumina catalysts by glow discharge atomization atomic absorption spectrophotometry
J. A. Holcombe, D. L. Styris and J. D. Harris	629	Mass spectrometric investigations of aluminum oxide reduction by gaseous aluminum carbides in electrothermal atomization
P. W. J. M. Boumans, J. C. Ivaldi and W. Slavin	641	***Views and Criticisms***: Measuring detection limits in inductively coupled plasma emission spectrometry—II. Experimental data and their interpretation
A. Scheeline	667	News on Fundamental Reference Data
		Research Note
J. Jaganathan, K. J. Ewing, L. E. Peiterson, E. A. O'Brien and I. D. Aggarwal	669	Determination of trace levels of iron and cobalt in zirconium fluoride using graphite furnace atomic absorption spectrometry
		Announcement
S. Caroli, E. Coni and E. Sabbioni	673	Milk: Ongoing activities and future prospects
	I	*Software Survey Section*

BOUMANS FESTSCHRIFT ISSUE
The Art and Science of Atomic Spectroscopy

W. Slavin	675	Preface
A. Scheeline	677	Tribute to Paul W. J. M. Boumans Festschrift Issue: The Art and Science of Atomic Spectroscopy
	679	Biography of Paul Boumans
	683	List of publications authored or co-authored by P. W. J. M. Boumans
P. W. J. M. Boumans	693	Editorial: *Spectrochimica Acta Electronica*
	697	Tableau de la Troupe

P. W. J. M. Boumans	711	Understanding spectroscopy with a view to rationalizing spectrochemical analysis: an abysmal adventure or a realistic ideal?
D. M. Chambers, J. Poehlman, P. Yang and G. M. Hieftje	741	Fundamental studies of the sampling process in an inductively coupled plasma mass spectrometer—I. Langmuir probe measurements
D. M. Chambers and G. M. Hieftje	761	Fundamental studies of the sampling process in an inductively coupled plasma mass spectrometer—II. Ion kinetic energy measurements
D. M. Chambers, B. S. Ross and G. M. Hieftje	785	Fundamental studies of the sampling process in an inductively coupled plasma mass spectrometer—III. Monitoring the ion beam
H. S. Niu, Ke Hu and R. S. Houk	805	Langmuir probe measurements of electron temperature and electron density behind the skimmer of an inductively coupled plasma mass spectrometer
L. L. Burton and M. W. Blades	819	Charge transfer between Ar and Mg in an inductively coupled plasma
W. L. Wiese	831	Spectroscopic diagnostics of low temperature plasmas—techniques and required data
P. B. Farnsworth, B. W. Smith and N. Omenetto	843	***Topics in Laser Spectroscopy:*** An investigation of the balance of charge exchange between Mg and Ar ions in the ICP
J. W. Olesik and J. C. Fister III	851	Incompletely desolvated droplets in argon inductively coupled plasmas: their number, original size and effect on emission intensities
J. C. Fister III and J. W. Olesik	869	Vertical and radial emission profiles and ion–atom intensity ratios in inductively coupled plasmas: the connection to vaporizing droplets
F. H. A. G. Fey, W. W. Stoffels, J. A. M. van der Mullen, B. van der Sijde and D. C. Schram	885	Instantaneous and delayed responses of line intensities to interruption of the RF power in an argon inductively coupled plasma
I. Ishii, H. Tan, S-K. Chan and A. Montaser	901	Helium ICP–AES: effects of induction frequency and forward power on plasma formation and analytical and fundamental properties
P. W. J. M. Boumans	917	Atomic emission detection limits: more than incidental analytical figures of merit!—A tutorial discussion of the differences and links between two complementary approaches—

J. M. Mermet, M. Carre, A. Fernandez and M. Murillo	941	Influence of the practical resolution on limits of detection using high line number gratings in inductively coupled plasma atomic emission spectrometry
Jinfu Yang, Zhexiu Piao and Xianjin Zeng	953	Improvement of selectivity with numerical derivative techniques in inductively coupled plasma atomic emission spectrometry
K. Lepla, M. A. Vaughan and G. Horlick	967	Simultaneous atomic emission and mass spectrometric measurements on an inductively coupled plasma
G. A. Petrucci, C. L. Stevenson, B. W. Smith, J. D. Winefordner and N. Omenetto	975	***Topics in Laser Spectroscopy:*** Experimental evaluation of the autoionization cross section of the magnesium transition at 300.9 nm by laser induced fluorescence
D. Fang and R. K. Marcus	983	Effect of discharge conditions and cathode identity on charged particle populations in the negative glow region of a simple diode glow discharge
B. V. L'vov, N. P. Romanova and L. K. Polzik	1001	Formation of soot during the decomposition of gaseous carbides in graphite furnace atomic absorption spectrometry
T. E. Barber, P. E. Walters, M. W. Wensing and J. D. Winefordner	1009	***Topics in Laser Spectroscopy:*** Diode laser atomic absorption using a new reference method
P. E. Walters, T. E. Barber, M. W. Wensing and J. D. Winefordner	1015	***Topics in Laser Spectroscopy:*** A diode laser wavelength reference system applied to the determination of Rb in atomic fluorescence spectrometry
R. E. Sturgeon, S. N. Willie and V. T. Luong	1021	Characteristic temperatures in a FAPES source
W. A. H. Van Borm, J. A. C. Broekaert, R. Klockenkämper, P. Tschöpel and F. C. Adams	1033	Aerosol sizing and transport studies with slurry nebulization in inductively coupled plasma spectrometry
Zicheng Peng, H. Klinkenberg, T. Beeren and W. Van Borm	1051	Determination of germanium, palladium and platinum in highly concentrated solutions of phosphoric acid and ammonium nitrate by flow injection inductively coupled plasma mass spectrometry (FI–ICP–MS)
J. C. Ivaldi, J. Vollmer and W. Slavin	1063	The conespray nebulizer for inductively coupled plasma atomic emission spectrometry

J. W. Elgersma, J. Balke and F. J. M. J. Maessen	1073	The performance of a low consumption thermospray nebulizer for specific use in micro-HPLC and general use in FI with ICP–AES detection
F. Laborda, M. T. C. de Loos-Vollebregt and L. de Galan	1089	Coupling of HPLC and ICP–AES for speciation
A. Scheeline	1099	News on Fundamental Reference Data
I. Roelandts	1101	***News on Reference Materials:*** Aluminium and aluminium alloy reference materials
